

SITMATIC®

Executive & Conference Seating

ALLEGRA

Design: Enrico Bellelli

Unique Allegra Features

Steel Frame Construction

The sinuous curves of the chair's profile are achieved by forming tubular steel into a rugged and durable chassis.

Spring Steel Flex

Multi-leaf springs allows the upper backrest to flex and automatically return the user to an upright posture.

Exquisite Upholstery

Sitmatic's tailors use traditional taped seam upholstery to add accentuating details to the Allegra's shape.

Cast Aluminum Base

The cast aluminum base is stronger and more durable than comparable plastic bases and is easier to recycle.

Sitmatic's unique polymer suspension material, in conjunction with actual leaf springs and torsion bars, give Allegra a ride that must be experienced to be believed. And because you don't want to sit on a plastic machine, Sitmatic appoints every Allegra chair with hand upholstered detailing befitting an executive office.

Shown with optional brushed aluminum base and arms.
